## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-28 and 49, drawn to a prokaryotic cell modified to shift the redox status and contains a gene encoding a catalyst of disulfide bond formation and a method for using the cell, classified in class 435, subclass 252.3.
  - II. Claims 29-48 and 50, drawn to a prokaryotic cell modified to shift the redox status and a genetic modification to increase proliferation and a method for using the cell, classified in class 435, subclass 252.3.
  - III. Claims 51 and 53, drawn to a protein produced by the method of claim 49, classified in class 530, subclass 350.
  - IV. Claims 52 and 54, drawn to a protein produced by the method of claim 50, classified in class 530, subclass 350.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are distinct products from each other, having different chemical, biological, structural and functional distinctness from each other, and are not disclosed for use together.
3. Because these inventions are distinct for the reasons given above and the search required for Groups I and II is not required for Groups III and IV, the search required for Group I is not required for Group II and the search required for Group III is not required for Group IV, restriction for examination purposes as indicated is proper.

Art Unit: 1636

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
